DOPPSTADTUS MARKETMIGHT DEALER UPDATE 6/9/10 Vol 1 Iss 12

**GIBSON MACHINERY JOINS  
DOPPSTADTUS TEAM**

The DoppstadtUS dealer network is once again being strengthened with the addition of Gibson Machinery. With offices in Oakwood Village, Ohio and Neville Island, Pennsylvania, Gibson Machinery will be representing Doppstadt equipment throughout Ohio and Western Pennsylvania.

Based just outside of Cleveland, Ohio, Gibson Machinery is nationally recognized as a leading distributor of construction and material handling equipment. For nearly ten years they have built a reputation for doing "whatever it takes" to exceed their customer's expectations, and have become synonymous with unmatched dedication and support.

Sean Carr, DoppstadtUS regional manager, is enthusiastic about our new partner. "Gibson is one of the most-respected equipment dealers in Ohio, and having them on the DoppstadtUS team is tremendous." Gibson's reputation for expertise, dependability and integrity aligns perfectly with the DoppstadtUS philosophy, and Lee Gibson, president of Gibson Machinery, recognizes that. "DoppstadtUS is exactly the kind of equipment partner we look for at Gibson, and their market niche complements our broader product offerings perfectly."

Gibson Machinery has conducted numerous equipment demonstrations throughout their territory, has already sold several units and has even entered into a few long-term rental agreements on special application systems. They are also planning a Demo Days event soon for additional exposure. Everyone at DoppstadtUS is excited to welcome Gibson Machinery as our new partner in Ohio, and are proud of the strength they bring us in this territory.

*"DoppstadtUS is exactly the kind of equipment partner we look for at Gibson, and their market niche complements our broader product offerings perfectly."*

— Lee Gibson, President
